Received: 4 August 2026; Accepted: 4 August 2026; Available online: 10 November 2026

We have retracted the following article:

Sinha J. Macroeconomic Dynamics of Environmental Degradation in India: Evidence and Limits of Structural Transition Toward Sustainability. *Ecological Civilization* **2026**, *3*, 10014. https://doi.org/10.70322/ecolciviliz.2026.10014.

Since publication, the Journal and Publisher have identified significant concerns regarding overlap between this publication [1] and a previously published article [2] by the same author.

Following the journal's standard procedures, an investigation was carried out by the Editorial Office and Editorial Board, confirming substantial overlap between the two publications [1,2]. Based on the findings and the significant extent of the overlap, the Editorial Board has decided to retract this article in line with SCIEPublish's retraction policy.

The Editor-in-Chief of/Ecological Civilization/approved this retraction. The author has been informed of this retraction and has agreed with this decision.
